## METEORSHOWER™

### NOTICE

- Assembly should only be performed by adults.
- Please read the entire assembly instructions before you begin.
- Before you start assembling, check to make sure you have all the parts listed.
- If you are missing any parts, DO NOT assemble, first contact SpaceJump™.

### LIMITED WARRANTY

SpaceJump™ warrant your SpaceJump™ accessory against defects in material and workmanship for **1 year**. The warranty is only valid when used under normal domestic use and in accordance with the terms and conditions. See our website for details.

**Warning:** The MeteorShower™ accessory is designed for outdoor use, and not intended to be used in any commercial environment. Take extra precaution as the mat will be slippery when wet. Limit jump height.

**Warning:** Users of the MeteorShower™ accessory must be aware of injury risk when playing. All users must be aware that use of a SpaceJump™ MeteorShower™ accessory is at their own risk. Children must be supervised at all times while using this accessory.

### STEP 1

Lay out the MeteorShower™ parts ready for assembly. These parts should include **cable ties, misting tube, hose adapters, soaker** and **mister attachments**. Note: If you would prefer to watch an assembly video, scan the QR code on the front page.

### STEP 2

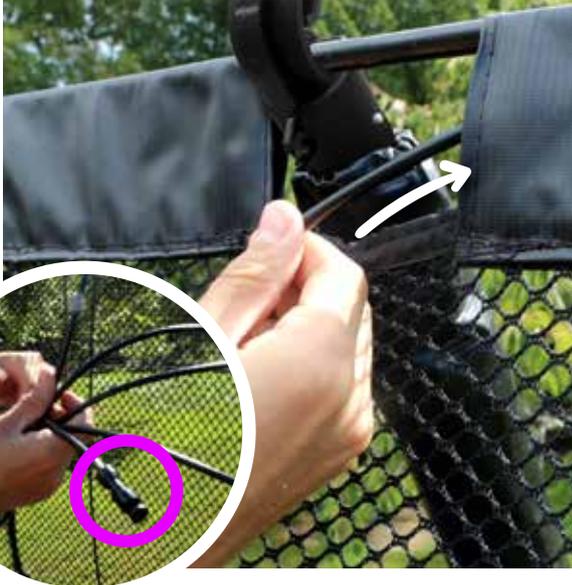

Connect a hose to an outdoor water source, and run it to the base of the trampoline, ready to be connected. Choose one of the net poles as your desired connection point. The misting tube will run down the length of this net pole.

# ASSEMBLY INSTRUCTIONS METEORSHOWER™

## STEP 3

Climb inside the trampoline with the misting tube and uncoil to find the last nozzle. Starting with this nozzle, begin to feed the misting tube through the safety net sleeve at the net pole you selected in step 2 (hose connection point).

## STEP 4

Keep feeding the mister tube through until you can pull it from the opposite side of the sleeve. Thread it into the adjacent sleeve, continuing the process the entire way around the safety net until you reach the starting sleeve where you began.

## STEP 5

Click each nozzle into position with its respective pole cap. If you are installing the MeteorShower™ on another trampoline brand, secure by attaching on to the net with two cable ties one on either side of the nozzle.

## STEP 6

Choose either the soaker or the mister attachment, then screw one into each nozzle. The mister releases a fine mist, whereas the soaker emits a broader spray.

# ASSEMBLY INSTRUCTIONS METEORSHOWER™

## STEP 7

Find the remaining tube with the garden hose attachment hanging from the entry sleeve, pass it over the safety net, then wrap it down and around its respective net pole for a tidier look.

## STEP 9

Your MeteorShower™ is complete! Shields up, it's time to jump your way through a meteor shower!

## STEP 8

At the base of the net pole, connect the MeteorShower™ tube and garden hose together using the hose adapter supplied in the MeteorShower™ kit.
